REMAIN SECURE WITH 24/7 BACKUP FOR YOUR OFFICE 365 MAILBOX

Protecting your mailbox against real-time cyber threats is more important now than ever. Educating your employees on how to spot a malicious email can be particularly difficult and a significant strain on your resources, particularly when cyber criminals are using much more refined and advanced techniques to target businesses – large or small.

With Acronis Office 365 Mailbox Backup, you don't have to face losing your valuable data. Stored safely and securely within a UK Acronis Tier-IV data centre, your mailbox data can be backed up 24 hours a day, seven days a week. It's the ultimate protection for your emails, contacts, calendars, attachments and tasks.

'70% of Office 365 users worldwide use Exchange Online, yet 29% of companies don't protect their cloud data and, of those that do, a staggering 80% have lost data.'

- ACRONIS "PROTECT YOUR OFFICE 365" INFOGRAPHIC, 2016

WHY DO I NEED TO BACK UP MY OFFICE 365 DATA?

Microsoft only replicates your Office 365 data within their data centres and will only keep messages in the deleted items folder for up to 30 days by default. Should you accidentally delete a message from this folder, or if someone maliciously deletes it, the

original data may not be retrievable. With many businesses subject to an email retention period length for regulatory compliance, mailbox backup and the ability to recover individual messages or entire mailboxes becomes mandatory.

Microsoft only replicates your Office 365 data within their data centres and will only keep messages in the deleted items folder for up to 30 days by default.

WHY CHOOSE ACRONIS OFFICE 365 MAILBOX BACKUP?

Whether you need to recover an individual message, an attachment, one mailbox or multiple, Acronis Office 365 Mailbox Backup is easy to use and incredibly agile. Plus, the instant restore feature means you can recover messages quickly for a worry-free experience.
